### DETAILED ACTION

1. Please note that the examiner assigned to this application has changed.
2. Acknowledgment is made of applicants election, of Group I, drawn to methods of inducing tolerance in vitro. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).
3. Upon review and reconsideration, the following Election of species will be required:

#### *Election/Restriction*

4. This application contains claims directed to the following patentably distinct species of the claimed invention:

I. (a) a method wherein absence of effective CD+4 T cell help is attained by exclusion of CD+4 T-cells,

(b) a method wherein inhibition or elimination of effective CD+4 T-cell help is attained by using a monoclonal antibody to a TNF superfamily member, or a monoclonal antibody to a TNF superfamily receptor,

(c) a method wherein inhibition or elimination of effective CD+4 T-cell help is attained by inhibiting the formation of mature forms of MHC II peptide complexes within the dendritic cell, and

→ (d) a method wherein inhibition or elimination of effective CD+4 T cell help is attained by inhibiting signaling consequent to dendritic cell-T cell engagement;

II. The pre-selected antigens that are:

(a) tumor antigens,

→ (b) viral antigens,

Art Unit: 1642

- (c) self antigens, or
- (d) transplantation antigens.

Applicant is required under 35 U.S.C. 121 to elect

(1) a single disclosed species for attaining the absence or exclusion of effective CD+4 T cell help from I, species a through d, and

(2) a pre-selected antigen from II, species a through d,  
for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1-22 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Karen Canella whose telephone number is (703) 308-8362. The examiner
